FROM THE PRINCIPAL

DON'T SCRATCH!
If you’re saying this to your child there is a good chance that they may have Head Lice. Unfortunately Head Lice is a very common occurrence in the community, especially in schools. The primary responsibility for the management and treatment of Head Lice in students belongs with parents and carers. As a school we are committed to helping parents to eradicate this but it takes the effort of all to achieve that result. Currently the warmer weather has encouraged the spread of Head Lice particularly in our early childhood classes. All parents and carers are asked to introduce a weekly check. Perhaps a Friday/Saturday afternoon check would work well. Then you can treat the children over the weekend and they can start the week with a clear head. There are many products available so ask your local chemist for advice. The attached Information sheet from Queensland Health will assist parents and carers. If you are aware that your child has Head Lice please notify the school. When we are advised of Head Lice our practice is to send a letter to all families in the identified class. We cannot exclude students with Head Lice but they should commence treatment as soon as possible. All members of the household should be treated, and pillowcases should be washed. It is also advisable to keep long hair tied back or in plaits, and remember don’t share hats, brushes or combs.

ATTENDANCE
Congratulations to Prep Red and Mrs O’Grady who once again achieved the highest attendance!! Well done Preppies! There was a slight improvement overall in our attendance last week and there are still a lot of students who are only attending for a few days a week. It’s very difficult for these students to learn and achieve their goals if they are not at school. Parents and carers are reminded that if you are having difficulties getting your children to school then you should contact the Office and arrange a meeting with either Mr Berryman or myself to see how we can help you.

BEHAVIOUR
This week the Behaviour rule is: Be a Learner – All Settings. Parade tomorrow will have Spelling Awards and all community members are invited to attend. Spelling is one area that our students need to work on across the school. It’s been great to see that our Indigenous students are achieving strong results in Spelling! Remember to be learners children need to work consistently and establish their patterns of learning.

CAMPS
The Year 5 students have safely returned from their camp at Fairbairn Dam and have many stories to tell. Next week our Year 6 students will be going to their Camp at Mudjimba and Brisbane.

Remember the last P&C meeting is next Monday afternoon, Enjoy your week,

Carry
20 November

This will allow us to process returns ready for all student book loans to be due back by the end of Week 7, 20 November. This will allow us to process returns ready for stocktake at the end of the year.

RC Closure – End of Term

The Resource Centre will be closing to students from Week 7 of this term to allow us to commence the collection of resources for stocktake in Week 9/10. Students from Prep-Year 3 will be joining other students in the undercover area before school.

Miss Lynn & Miss Schneider

From Mrs Layt...

Class music testing is all practical this week.

Senior Signers are welcoming Santa at 7.00pm on Thursday night at Stocklands so come along and join us. Notes for signers have been sent home.

In addition to the Senior Signers performing at “Salute” – a musical tribute to the Australian Armed Services this coming Saturday, I have invited our Year 4, 5 and 6’s to sing with us. I have sent notes home with all the details and interested students can be dropped off at North Rockhampton SHS Performing Arts Building in Simpson St at 1.45 and collected at 3.10pm.

⇒ Percussion students – Ms Kolb will not be here this week.
⇒ No ukulele practices this week
⇒ Instrumental Showcase date has been changed to Monday 23rd November [5.30 – 6.30pm]

Rehearsals this week

Monday 11.00
String Ensemble

Tuesday 8.05
Senior Choir

Wednesday 8.05
Senior Signers

8.05 Yr 5/6 IM students

Thursday 8.15
NO Band Utensils

11.00 Yr 7/8 IM students

1.30 NO Mugs

Friday 8.00
NO Cups

1.30 *SMALL* Concert pianofortes

11.00 FULL Concert Band

2.00 Cresso Students

Instrumental Music Recruiting Concert is this Wednesday at 2.00pm in the hall. Our IM students will be performing and Mrs Iott and Miss Dalglish will be discussing the instruments and the program here at Cresso. The Cresso community is most welcome to attend.

Yours in song

Mrs Layt

Everything Quirky

Inside PE

Swimming commences this week. Parent help is required for lessons to go ahead. Infant classes need parents in the...
pool and to assist with changing. Upper classes don’t usually require “in pool” help. You don’t need to be able to swim yourself; I will provide lesson content each week.

Classes from yrs 1-6 will be working toward their RLSSQ awards. Those children who are in level 4 and above need to bring additional items to lessons.

**DATE CLAIMER: Swimming Carnival:**
Week 9 Tuesday 1st December Yrs 4-6, Wednesday 2nd December: Yrs 1-3.

**Go’N’Run**
Go’n Run on Thursday and Friday.

**Quirky’s Quotes**

> “Why can’t the house clean itself? It seems to get dirty by itself!”

Louise Quirk

---

**Crescent Lagoon Swim Club**

Hello CLSS Families!

On the weekend, Coach Sonn and Secretary Karina travelled to Biloela to learn about A Grade swim meets. The day was extremely busy, but worthwhile. We learned so much, made some new friends and volunteered our time to help on the day!

Our third competition of the season that we’re looking to attend, will be Saturday 28th November at Emu Park. This will be a Novice meet, great for our swimmers who are starting out in competition swimming.

Thursday club nights continue to be a success, and our swimmers are really enjoying themselves!

If you’re keen to find out what swim club is all about, come to the pool in Willis Street! Club is every Thursday, arrive 5:30pm for swimming to start at 6:00pm. Swimmers are entitled to two free swims before joining, so come and give it a go! We offer a cheap meal and drink for dinner too!

Children age 7 and under are free to join and 8 year olds only half price! Swimmers have the choice of membership, to swim just for fun, or competitively.

Any enquiries, please contact our coach, Sonn Galvin at crescentlagoonswimclub@yahoo.com.au

Thank you,

Swim Club Committee

---

**Gracemere Cubs JRL Sign On Day/Meet And Greet Cedric Archer Park**

**Saturday 14th November: 9am – 12pm**

Also some fantastic news, if you are a girl and would love to play we are signing on Under 14’s and Under 17’s

**Come Down For A Free Sausage Sizzle, Meet Some Coaches, New Faces Around The Club And Check Out What We Have Been Doing To The Place!**

---

**Year 5 Camp Fairbairn**

Last week Year 5 went on a leadership camp to Fairbairn dam. Here are some snippets of their writing from camp.

**Camp Fairbairn dam**

When I arrived at camp I was so excited. Denzyl, William, Icky and I walked over to the tent and set up for the night. Everyone was put into three groups. Wallabies, Echidnas and Bandicoots. I was placed in Bandicoots with only three boys the rest were girls. Our first activity was a group challenge. We had to get everyone over this pit of lava with only six dots. Instead of going at the same time, which was too hard, we tried something different. Instead we got Summer, William, Denzyl and myself to stand on the dots and get the rest of the team to walk across us. A few hours later we had dinner. SPAGBOWL!! Mmmmmm the master dish. YUM!!

By Thomas

**Camp Fairbairn**

When we arrived at camp Fairbairn we carted our own mattresses to our tent, it took two trips to get my bags to my tent. After we had eaten lunch we headed to our activities. My team was the Wallabies, so we headed to rock climbing first. Our instructor, Tony told us how to put on a harness and how to use it. Once everyone was done we headed over to the ten meter climbing wall.

Nearly there I think as I reach out to the next knob on the climbing wall. I have now reached the top of the wall and I see Fairbairn dam ahead of me. I call out to the instructor and he tells me to place my feet on the wall and hands on the rope as my safety team lowers me down.

By Celine

**Camp Fairbairn**

Group challenge activities for the Echidnas were; the meat grinder, mohawk walk, canoeing, catapults, the whale watch sea saw, the electric fence, the hoop game, rock wall, lava in Hawaii and the rope challenge.

My favourite thing that I absolutely loved was catapults because we were taught to tie knots that some of us didn’t know how to tie. We got to shoot at our team mates. In canoeing we capsized the canoe in pretty deep water and I couldn’t touch the bottom. At the end of canoeing, well I’d call it swimming not canoeing.

Over all camp Fairbairn dam also known as Lake Maraboon is an all-rounder for adventure, fun, learning to be a leader and solving problems in many different ways, communicating & everything like that. I rate Fairbairn dam / Lake Maraboon 10out of 10, it’s awesome and a perfect place to go to. It should be in the top 10 places to go to on your list and the instructors there were great!!!!!

By Mitchell
Head Lice

Head lice (Pediculus capitis) are small, wingless, egg laying insects found on the human head. They grow to about 3.5mm (the size of a sesame seed or pin head). Head lice live on the hair and feed by sucking blood from the scalp. They are pale grey in colour before feeding and reddish brown after feeding. Live eggs (sometimes called nits) are glued to the hair shaft within a distance of 1.5 cm from the scalp. They hatch in 7-10 days as young lice (nymphs). It takes up to ten days for the nymphs to become mature lice and begin laying eggs. Adults are larger than nymphs and a mature female lays up to eight eggs per day.

Signs and Symptoms:
Detection of adult lice or nymphs on the scalp is the best way to determine if head lice are present. While most people with head lice will not develop an itch, a small number of people develop an itch due to an allergic reaction to the saliva of the louse. Scratching can give rise to secondary bacterial infections on the scalp. Swelling of lymph nodes (adenopathy) in the neck can occur in some people due to this infection. The presence of eggs is not a reliable sign of active head lice. Eggs need the warmth and moisture of the scalp to hatch. Eggs that are further than 1.5cm from the scalp are dead or hatched and do not need to be treated. Dead and hatched eggs can remain in the hair for several weeks.

Treatment:
Treatment should only be applied when live lice are found on the head. To break the cycle, all infested people should be treated at the same time.

There are two methods of treatment:
1. Non-insecticidal treatment using the conditioner and combing technique
   - This is the same as detection using conditioner and combing (see above) except continue combing with the head lice comb until all the conditioner is gone. The conditioner blocks the louse's breathing pores and stuns the louse. This, together with the slippery effect of the conditioner, makes it easy to mechanically remove the lice. Repeat the conditioner and combing method every second day to remove the young nymphs as they hatch. Continue until no live lice are found for ten consecutive days.
   - This treatment method is equally as effective as insecticidal or other chemical treatments but generally requires longer treatment times. However, it may be preferred as a cheaper alternative to insecticidal or other chemical treatments.
2. Treatment with synthetic or natural insecticides or other chemicals
   - There are four groups of treatment agents available in different forms (ie. shampoo, mousse, and lotion) which can be obtained from chemists without prescription. All preparations must be applied strictly according to the manufacturer's instructions. None of them should be used on children under two years of age, except on medical advice.
   - No chemical treatment kills all the eggs. A second treatment should be applied 7-10 days after the initial treatment to kill the nymphs that have hatched from the eggs remaining from the first treatment. Do not apply the treatment more than once per week as more frequent applications could lead to scalp problems and have little or no effect. If lice are still found after three weeks of chemical applications, switch to the non-insecticidal method until no lice are found. Eggs are the most difficult stage to kill. The most effective way to remove eggs is to actually pull them off the hair using your fingernails.

Chemical Head Lice Products
The following types of active ingredients were approved in Australia by the Therapeutic Goods Administration (2003) for use against head lice:
- Pyrethrins, eg. Amcal Head Lice Foam, Lyban Foam
- Synthetic Pyrethroids (bioallethrin, permethrin), eg. Paralice, Quellada Head Lice Treatment
- Organophosphates, eg. Exolve Medicated Foam, Lice Rid
- Combinations of Herbal and Essential Oils, eg. Quit Nits Natural Head Lice Treatment, Herba Lice.

Treatment Outcomes
Checking whether the treatment product is effective
It is essential to check the effectiveness of every treatment after a product has been on the hair for the recommended amount of time and before washing it out: Comb the hair with a fine tooth head lice comb, wiping the comb onto a white tissue after each sweep. Repeat until whole head is combed and little treatment formulation is visible on the hair.

After five minutes examine the tissues and assess the lice as dead (no movement), inactive (louse is stationary but moving legs or antennae) or active (louse moving).

If the product is effective, all lice should be dead.
What to do if the product of choice does not work
If the product is effective, ie. head lice are not dead at the end of exposure time, you can switch to the non-chemical method while waiting 7-10 days before re-treating with a different active ingredient. Continue checking the effectiveness of treatment products until an effective product is found, or use the non-chemical method.

Why treatment agents may not work
True treatment failure has occurred when live head lice are detected immediately after the end of exposure time to a treatment agent. Failures can sometimes occur even when solutions are used according to the manufacturer's instructions. This may be the result of using an ineffective treatment formulation or the lice having become resistant to a particular treatment agent. It is then preferable to change to a different formulation or another treatment agent with a different active ingredient, or use the conditioner and combing method.

The reappearance of head lice in a short time after a successful treatment (ie. all lice were dead after the exposure time) does not indicate treatment failure. It could be due to head lice hatching from eggs which survived the initial treatment or re-infestation from another source. Ensure that you maintain a weekly detection routine and apply follow-up treatments as specified in the treatment section.

Transmission:
Head lice do not jump or fly. They are spread mainly by direct head to head contact. They have strong claws and move by swinging from hair to hair. This can happen when people play, cuddle or work closely together.

A few head lice have been found on combs, hairbrushes and pillowcases. However, transmission from these objects can only occur when the item is used within the 24 hour period following use by an infested person. This is because head lice can survive only up to a day away from the human host. Head lice must feed on human blood every six hours to replenish their water supply or they will die from dehydration. The longer they are away from a human host, the weaker they become and the less likely they are to infest the next person. Head lice do not live or breed on animals, bedding, furniture, carpets, clothes or soft toys. Their life cycle must be completed on the human head. Head lice are a very common problem in schools and institutions everywhere in the world. While they are not a threat to health and do not transmit disease, they do cause a lot of distress and anxiety for families and schools. Anyone can get head lice. They affect all socioeconomic groups and are not a sign of poor hygiene. They have no preference for ethnic background, hair colour, hair type or age.
Detection of head lice
All parents should check their children and other family members for head lice regularly as early detection decreases treatment time and helps break the breeding cycle. The most effective way to detect head lice is by using the hair conditioner and combing method. You will need white coloured hair conditioner, an ordinary comb, a fine tooth head lice comb and white tissue/kitchen towel. Apply sufficient white conditioner to dry hair to completely cover the scalp and hair from roots to tips. Use an ordinary comb to detangle hair and evenly distribute the conditioner. Divide the hair into four sections. Comb hair from root to tips using a fine tooth head lice comb. After each stroke, wipe the comb onto a white tissue, checking the comb and tissue for head lice. Comb the whole head, checking for lice. Put all tissues in a plastic bag, tie the top and put the bag in a rubbish bin. All members of the family/household should be checked once per week using this method as long as infestation remains within the household.

Prevention:
While there is no need to vacuum, wash or treat with insecticide any furniture, clothing, bedding (except pillowcases), toys, carpets or hats, the following actions can be taken to help prevent infestation/re-infestation:
Avoid head to head contact with other persons.
Keep long hair tied back or in plaits, especially at school.
Do not share brushes, combs, or pillows.
Wash combs and hair brushes after each use (60°C for 30 seconds).
Pillow cases of persons known to be infested should be washed daily on hot cycle or put in the clothes dryer for 15 minutes.
Keep hair short, particularly during an outbreak. It is easier to detect and treat head lice in short hair.
Notify your school so that others can be alerted to the problem and can check for head lice and arrange treatment if necessary.

Help and assistance:
For more information and assistance in managing head lice, families can contact their local public health nurses, child health clinics, pharmacists and family doctors.

---

Capricornia Silver Band presents

SALUTE!
A tribute to the Australian Defence Services

Popular Songs from 1915-2015 for the Centenary of ANZAC with guest performances from Crescent Lagoon State School Choir, Ellie Belonogoff, Trinity Hoolihan & piper James Kelso

Simpson Street
North Rockhampton

Admission $10 — Contact: Email: secretary@capsilver.org.au — T: 0475 697 720
Hello and welcome back to another Camp Australia newsletter … over the past few weeks we have spent lots of quality time both indoors and outdoors when the weather permits … we have been giving the children the choices as they become quite hot and irritable with this terrible heat that we have been having over the last few weeks. Our morning group has been getting very excited by the large number of ducks we have visiting in the mornings and have started trying to get closer to them so that we can feed them some scraps … this hasn’t really gone to plan for them as the ducks are quite scared of them but they have lots of fun trying and naming them all as well – although to me they all look the same :) This is a great experience for our children as not only does it get them outside but it gets them interacting with the wildlife and learning new experiences.

We have played lots of sports and group games over the past few weeks with our children particularly enjoying the musical group games such as four corners, musical statues and musical chairs. The boys in particular are very competitive in these games. Our children have also completed activities for our presents that will get sent over to Africa for children in OSHC services over there. This is a great way for our children to learn about students from another culture as well as the country that they live in. The jigsaw puzzles that we are creating and designing for our gifts will be sent over to Africa along with the others from Camp Australia services all around Australia. This is part of our Global Citizenship Program.

Last week also saw us say a very sad farewell to our amazing Miss Sheridan as she married her high school sweetheart on a beautiful seaside wedding on the weekend. Miss Sheridan will now take up residence in Gladstone with her husband Ben and much loved pooch Dora the chocolate Labrador. We wish Miss Sheridan and Ben all the very best of everything for their futures together xx

Our children will be continuing to finish off their gifts for the children of Africa first and foremost. We will also be creating our own display about our Global Citizenship Program and the things we are learning along the way. You can see our progress towards this on the purple notice board located near the kitchen. We will also be creating some crazy weird looking recycled box robots over the coming days. We will be working on this in groups and having a competition to see who can come up with the craziest looking robot. We will also be starting to work on our presents for our parents for Christmas as we are only 5 weeks away from the end of the school term. We will also be recreating our little garden planter boxes over the next few weeks and planting them up with some beautiful colourful flowers. We will also be making some beautiful paddle pop craft boxes and rocket ships just to name a few experiences that we will be taking part in.

We still have a high number of parents not contacting us when their child is either absent from school or goes home sick throughout the day. We have very strict timelines to locate a child who is booked in and not arrived so please ensure that you take the time to either send a quick text message or call the service phone and leave a message if it is not attended at the time.

The numbers to call are the Customer Service team on 1300 105 343 or the Crescent Lagoon service phone on 0421 078 743 and either leave a message or send us a quick text. We get very concerned when children don’t arrive for care.

*Almost all Australian residents are eligible for some form of government rebate.
1. The Child Care Benefit (CCB) is income tested and scaled, resulting in a reduction of between 0% and 85% of session fees.
2. The Child Care Rebate (CCR) is not income tested and is available to almost all Australian families. It provides a rebate of 50% of fees owing after the CCB has been calculated and considered.
Not long to go to our Christmas Carnival!

Have you

☐ ✓ Pre purchased your all night ride pass
☐ ✓ Returned your sold (or unsold) multi draw tickets
☐ ✓ Donated a prize, plants or books
☐ ✓ Volunteered to help on the night or baking day

BAKING DAY IN THE TUCKSHOP – FRIDAY 27 NOVEMBER
The tuckshop will not be running on the Friday of the Carnival as all the ovens will be full of yummy cakes, slices and biscuits! We’d love to welcome any parent (or grandparents, etc...) who can spare an hour or two on Friday to help us mix, pour, bake and decorate, then package goodies for the fete. Mr Comollatti will organise all the ingredients, we just need willing workers!

If baking is not your style, we will have lots of other things that need to be taken down to the hall and set up, so if you can help out in any way on Friday the 27th please call in.

CALLING ALL SANTA’S
Does anyone want to volunteer to dress up as Santa and walk the crowd for about half an hour handing out lollies?????
Donations for the Stalls and Helpers needed  
Can you help out?

Can you help with any of these? We need:

- Set up and pack up helpers – moving tables, chairs etc
- Stall helpers – please send the cut-off slip in to your child’s class or to the office
- Plants and cuttings
- Books & magazines
- Share size chocolates
- Homemade jams, relishes and chutney
- Cakes or sweets (labelled with ingredients)
- Buck of Sand

Please offer an hour of your time to help out on your child’s class stall if you are able, every bit of help will be greatly appreciated.

CLASS STALLS  These are the Class Stalls for the carnival, Swim Club will be running the Sausage sizzle.

Dear Friend & Supporter,

Crescent Lagoon SS are holding a Christmas Carnival to raise money to improve our school facilities. We hope that you will be able to support our fundraising efforts by donating a prize or gift voucher towards our Multi-Draw Raffle, which will be drawn at the Christmas Carnival on Friday 27 November 2015.

All donations will be advertised in our School Newsletter and will be acknowledged on the night of the Carnival; hopefully generating extra business for you. This raffle is a major drawcard at the Carnival and we sincerely appreciate any contribution you can make to our School. Thank you for your time and consideration, your support is very much appreciated.

If you are able to help, and would like someone to collect your donation, please either call the school on 4999 3333, text Paula on 0409 492 876 or email pandc@creslagoss.eq.edu.au and we will be very pleased to arrange collection. Donations can also be delivered or mailed to the school at the address above.

Thanks again for your assistance.
Yours sincerely,

Mrs Paula Ireland
President CLSS P&C Assoc.
Cresso Christmas Carnival
